Rubric

AI-panel evaluation	Maximum	Points
Effective / creative use of AI <ul style="list-style-type: none">- Musical qualities- Design and iteration of system- Workflow / interaction with system and output- Use on different musical components- Use of data	6	-
Expansion of creativity <ul style="list-style-type: none">- Process- Result	2	-
Furthers understanding <ul style="list-style-type: none">- Explains the process- Provides intermediate results	2	-
Diversity and collaboration	2	-
Maximum points	12	-

Details

Effective / creative use of AI

Creative improvements / adaptations in the use of AI for various music components (i.e. melody, lyrics, structure, sound/voice synthesis, the performance, the production etc), including, but not limited to:

- Overall impression of the song
- What was the overall idea of how AI would enhance the creative process?
- What was the overall workflow?
- When is AI used? And for which music component?
 - What is the algorithm/model? Was it novel? How was it adapted to serve the creative goal?
 - Is it data-driven? If so, how is the data used?
 - What is the interaction?
 - Input, output, how was the output adapted to fit the other parts of the music?
 - How does it impact the creative process?
 - How was it improved?
- Was AI used in the performance? (i.e. Performance: live improvisatory interaction with AI)

Expansion of creativity

Expand creativity and fosters understanding, including, but not limited to:

- Process: Find new ways to be creative
- Result: If the outcome was novel

Further understanding

Including, but not limited to:

- Further our understanding in how AI can be used in the creative process, discusses both benefits and limitations, and also its implications (i.e. ethical implications for both the creators and listeners)

Diversity and collaboration

Including, but not limited to:

- How the team is able to bring together collaborators from a diverse set of background
- Has the teams' submission lead them to consider new ethical considerations?
